Apple uses a walled garden for their apps. What does it mean and why does apple implement this?

"Walled Garden", Is known for its closed-platform software approach, It consists of a high protective approach to apple's ecosystem and technology, implementing and sustaining high-security measures. Apple uses and implements this as it is for a more secured and protected approach for their customer's satisfaction and privacy. It is also stated that, the walled-garden approach gives app more control over its devices and software, and they function efficiently and better.
